

Lifestyle Track: Planning an Escape

Travelyn

The All-in-One AI Travel Companion:
From Group Sync to Dynamic In-Trip Replanning.

Team: Trail Never Ends

The Problem

Group travel should feel exciting — not exhausting.

GOOD TRIPS
BETTER
TOGETHER

Scattered Across Too Many Apps

Chats, spreadsheets, expense calculators and booking sites create planning fatigue.

Group Decision Paralysis

Clashing preferences, budgets and dietary needs turn simple choices into endless debates.

Disruptions Break Rigid Plans

Weather, closures and transit delays can derail an itinerary with no context-aware alternative.

Awkward Bill Splitting & Currency Friction

Foreign receipts, taxes, service fees and uneven orders create social tension and math errors.

Our Proposed Solution

Smarter planning. Smoother trips. Happier groups.

1 Smart Trip Guidance

Get real-time weather alerts, smart detour suggestions, and live chat help while on the go.

Weather Alerts

Smart Detours

Live Chat Support

2 Easy Group Decisions

Quickly vote on activities and let the app automatically build an itinerary that balances everyone's preferences.

Group Voting

Smart Itinerary

Everyone's Preferences

3 Simple Expense Splitting

Scan paper receipts, claim your specific items, and automatically settle group debts across different currencies.

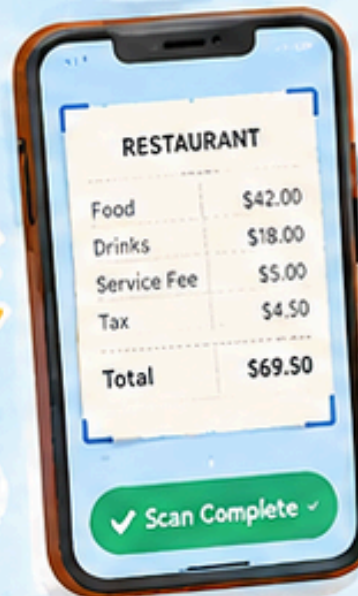

Scan Receipts

Claim Your Items

Multi-currency Settlement

Split Result

Angela	\$18.20	Paid
Ken	\$17.30	Paid
Rina	\$16.50	Pending
Jay	\$17.00	Pending

4 Interactive Digital Scrapbook

Turn your trip into a game by checking into landmarks, collecting virtual passport stamps, and saving Polaroid-style memories.

Check-in Landmarks

Collect Stamps

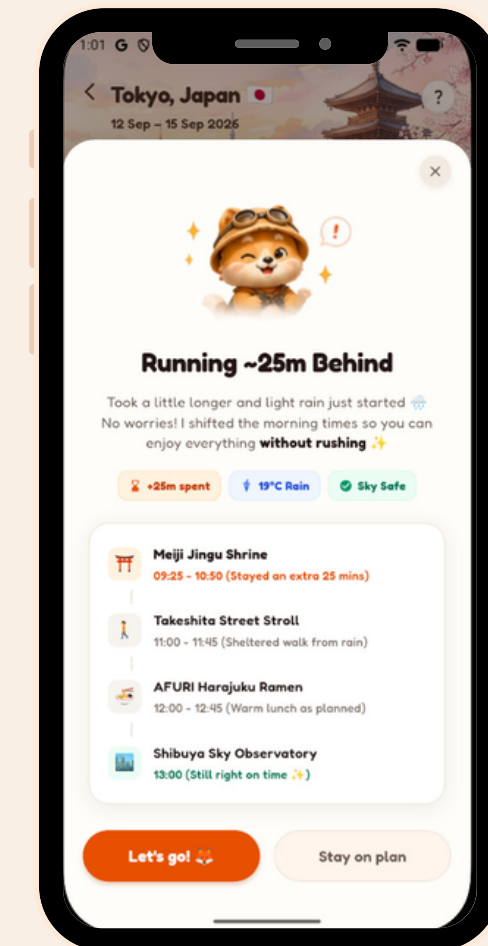

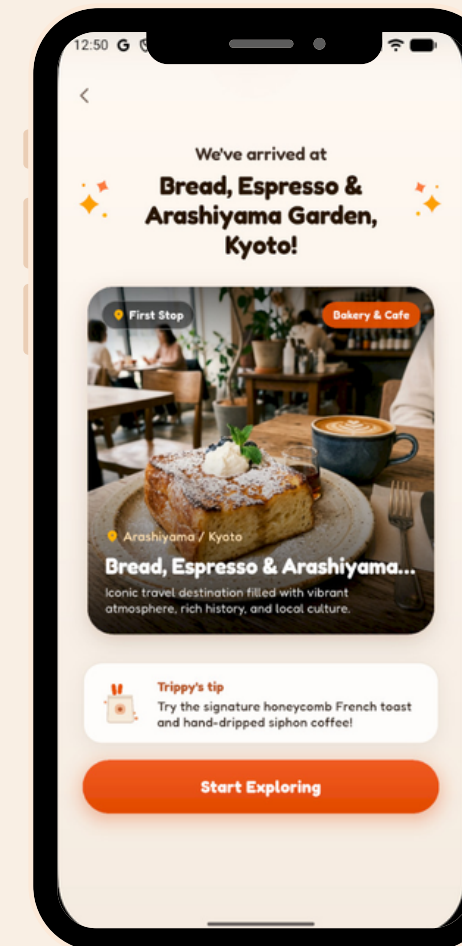

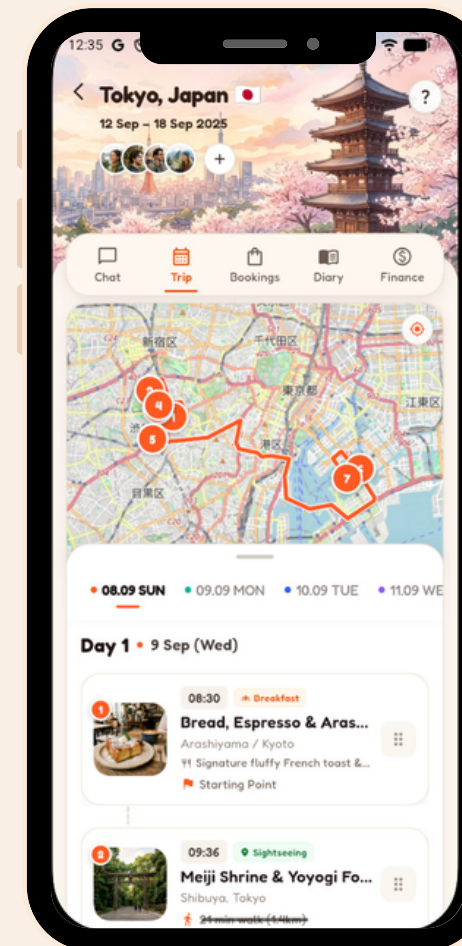

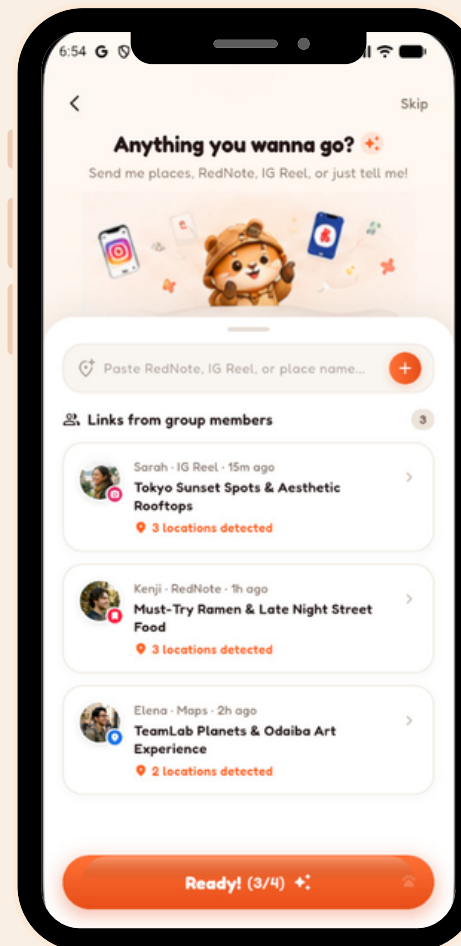

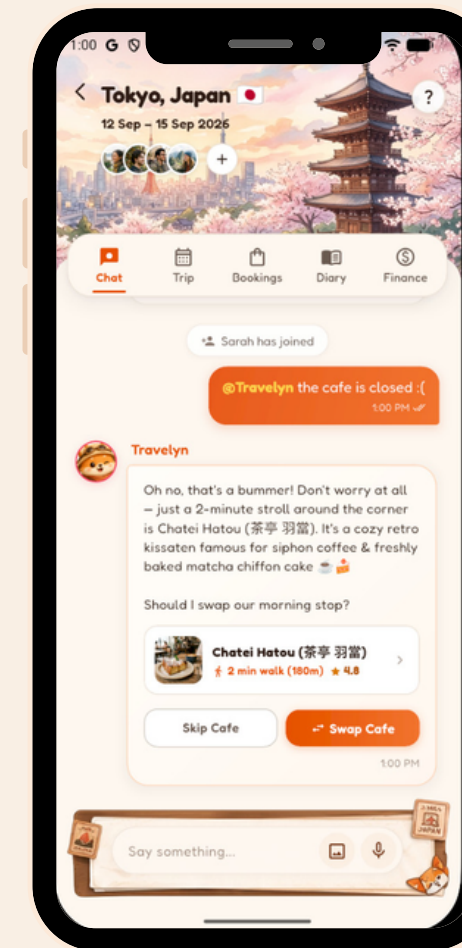

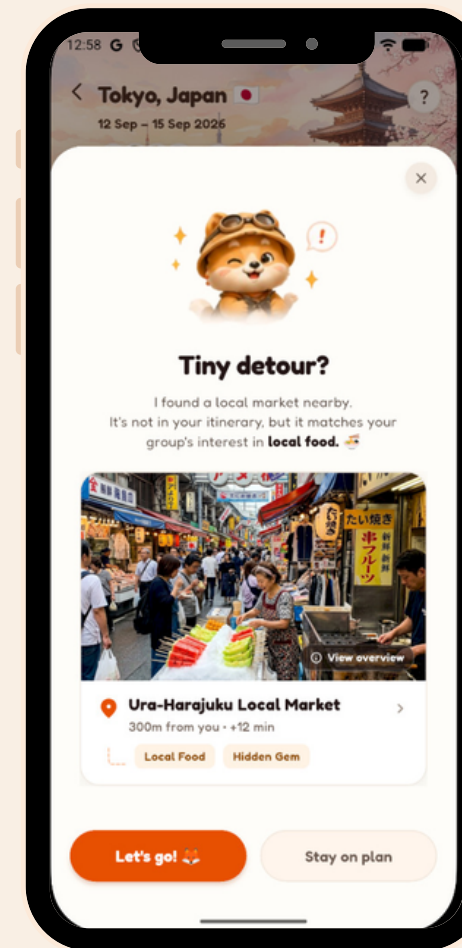

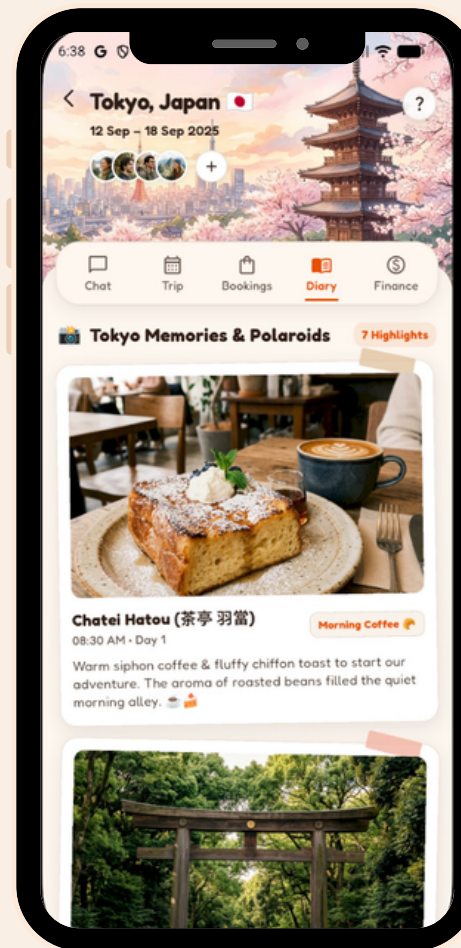

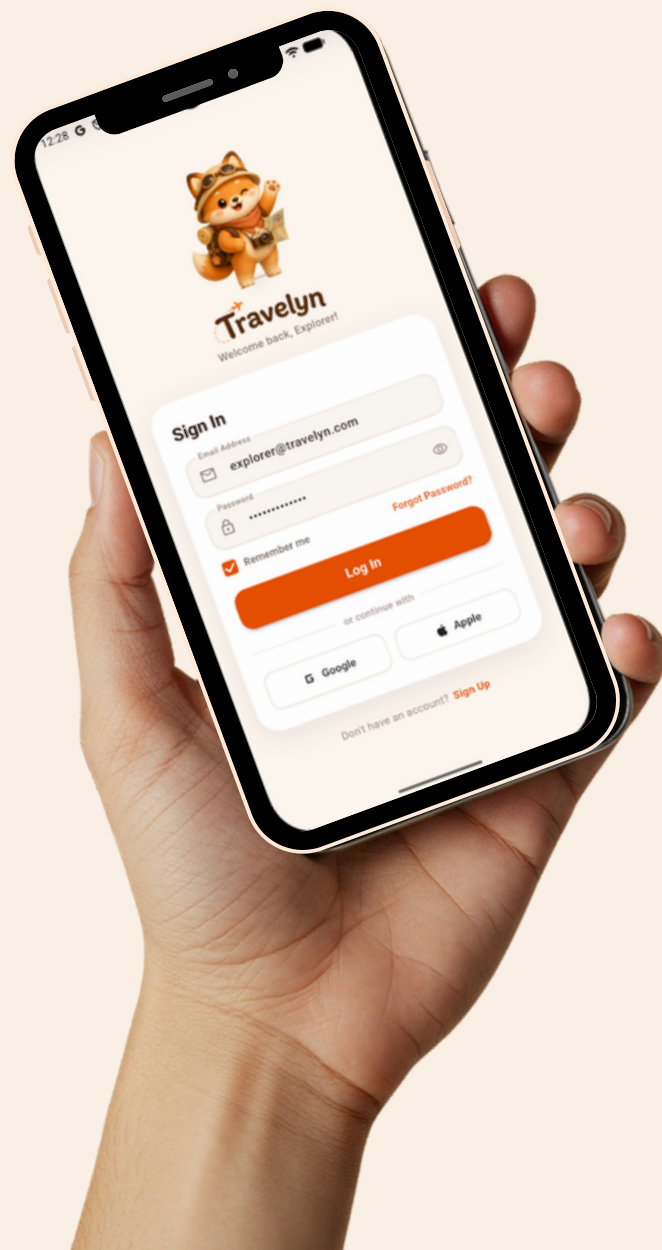

Save Memories

Your Travel Companion

Mobile Client (Flutter)

iOS & Android • Cross-platform

- UI & Design System**
Material 3 • Google Fonts (Fredoka) • Design Tokens
- Maps & Navigation**
flutter_map • latlong2
Mapbox Directions & Vector Tiles
- Media & Camera**
image_picker
(camera check-ins & receipts)
- Networking & Realtime**
http / dio (REST API)
web_socket_channel (WebSockets)
- Local State & Storage**
shared_preferences /
flutter_secure_storage
(auth tokens & offline cache)

HTTPS
REST API

WebSocket
(Realtime)

Backend (Serverpod - Dart)

Cloud Application Server

- Authentication & User Management**
- Business Logic**
(trips, itinerary, expenses)
- Route Calculation & Location Services**
- AI Proxying**
(Gemini + Vision)
- Realtime Engine (WebSockets)**
• Multi-user chat • Voting sessions • Instant schedule sync
- Background Task Queue (Redis Workers)**
• Morning briefings • Voting timers • Flight/weather alerts

Persistence & Storage

- PostgreSQL + PostGIS**
• Users, trips, itinerary, stops, bookings
• Expenses, chat, forum posts
• Spatial queries & geofencing
- Redis**
• Active trip state • Live voting counters
• WebSocket pub/sub • Rate limiting
- AWS S3 / Cloudflare R2**
• Photos, receipts, avatars, scrapbook
• Pre-signed upload URLs
• Cloudflare CDN

AI & Third-Party Services

- Google Gemini 2.5 Flash**
• Itinerary generation
• Trippy companion chat
• Recommendations & detours
- Google Cloud Vision API**
• Receipt OCR
• Line-item extraction
- Mapbox API**
• Directions, Geocoding, Matrix
- Firebase Cloud Messaging**
• Push notifications
• Morning briefings, mentions
• Voting deadlines, delay alerts

Secure • Scalable • Real-time • AI-Powered

Core System Flows

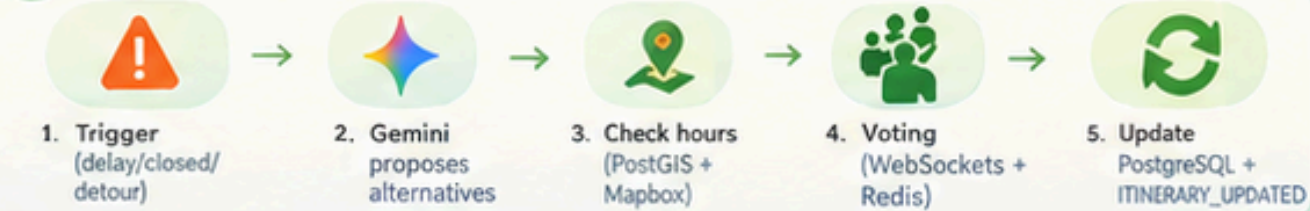

1 Trip Creation & AI Itinerary Generation

2 Real-Time Group Collaboration & Chat

3 Dynamic Plan Adjustment (Voting)

4 Photo Check-in & Scrapbook Diary

6 Bookings Intelligence & Recommendations

Why Travelyn?

				
All-in-One Trip Flow (Plan + Book + Split + Journal)				
In-Trip Planning & Dynamic Replanning				
Polaroid Camera Check-Ins with Stamps				
Group Vibe-Casting & Consensus Voting				

Our Target Market

Different groups.
Same dream —
Better trips together!

Gen Z & Millennial Group Travelers

High-frequency
leisure travelers

Value shared experiences,
aesthetic social memories

Transparent group
bill splitting without
awkward conversations

TRAVEL

Backpackers & Independent Explorers

Budget-conscious
travelers

Spontaneous
recommendations

XP-driven passport
gamification

Itinerary-optimized
bookings

Campus Clubs, Societies & Small Teams

Student associations &
corporate retreat organizers

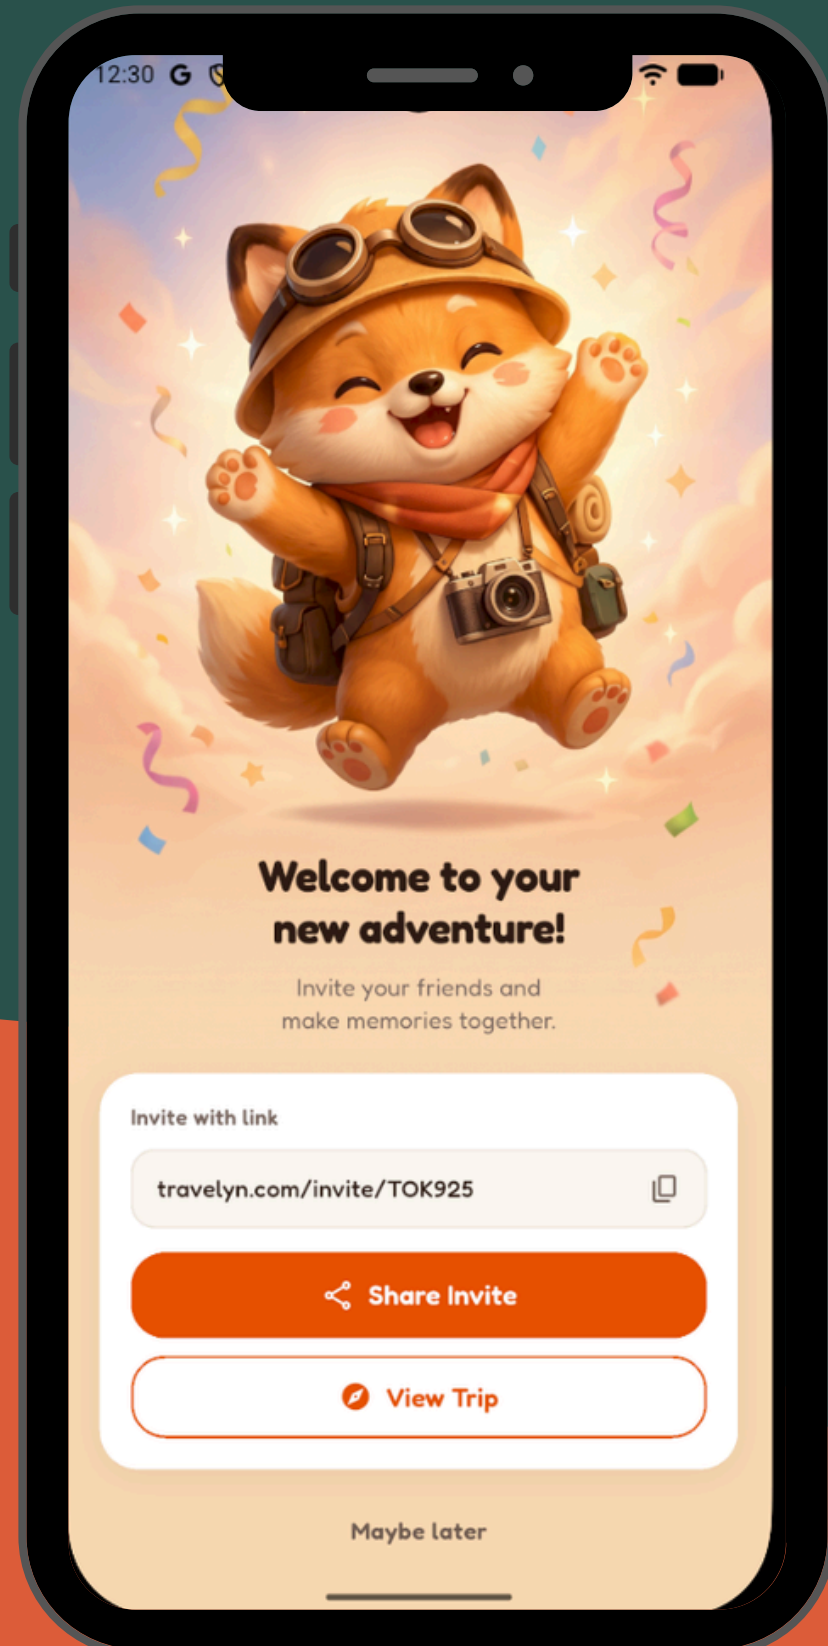

Consensus-based voting

Hassle-free
expense accounting

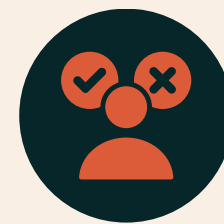

What concretely changes?

One place for the whole trip

Combines group chat, itineraries, bookings, maps, and expenses to eliminate app-switching

Faster group decisions

AI instantly turns conversations and individual preferences into a concrete plan

Highly adaptable

Automatically adjusts itineraries on the fly to handle changing schedules or unexpected events

Personalized discovery

Recommends spontaneous, local experiences tailored specifically to your group's interests
